Click2XLS Crack is an Autocad extension designed to export clicked point coordinates to Excel sheets. Make your Autocad more accessible and easy to use with this extension! This extension is a very flexible product and I plan on adding more features to it over time. Why you should choose to use Click2XLS Free Download: You can click on any object (e.g. component, group, etc.) and it will automatically export the coordinates (X and Y) to a spreadsheet, saving you much time and effort. You can also paste the output of this tool directly into a text-editor, allowing you to further edit the imported file (e.g. with your favourite word processor). You can also export multiple files from one click! Update: There is no new version yet for this extension. Installation: - Download this zip file and extract it. - If you have installed the Autocad Plugin from the Tools menu (in your 32bit or 64bit Autocad 2012/2016), simply open that menu and install the "Click2XLS" extension. - You will be able to activate the extension through the Autocad Plugin's menu (Tools > Plugin Manager), under "Extensions" in the list. The instructions on how to install other types of extensions can be found on the Autocad Plugin manager's "Installing" tab. - You may need to restart your Autocad to have the extension installed. How to Use: In your 32bit or 64bit Autocad 2012/2016, just make a left click on an object (e.g. component, group, etc.). A new dialog window will open up, stating: Open file (text): click here Press Ctrl+A (or go to File > Open from the menu) Click the Import button In the pop-up window, select "XLS" Select your destination file: "Open Excel Sheet" is the default destination and all is good. However, if you wish to navigate to a new location (e.g. for example, a compressed folder on your computer), you can type the file location in the corresponding text box. The remaining text boxes are optional for you to fill in. If you are filling in the first row, the data will be imported into the first row of a newly created workbook. Please note: if you skip the row selection, the first row will be 09e8f5149f
